

Membrane Protein Folding

MAY 19-22, 2013 | SEOUL, SOUTH KOREA

Visit www.biophysics.org/2013korea to submit an abstract and register for the meeting.

The Biophysical Society, along with the Korea Institute for Advanced Study (KIAS, is sponsoring a meeting on membrane protein folding. The meeting will focus on fundamental aspects of how membrane proteins fold, ranging from physical chemistry (in vitro and in silico) to aspects of folding in the cell. In addition, the meeting will feature practical implications of protein folding such as protein design, stabilization, and misfolding in disease.

The meeting's organizing committee members are James Bowie, University of California, Los Angeles; Karen Fleming, Johns Hopkins University; Jooyoung Lee, KIAS; and Sanguk Kim, POSTECH.

IMPORTANT DEADLINES

- Abstract Submission January 13, 2013
- Early Registration February 19, 2013
