

BPS2023

67th Biophysical Society Annual Meeting
February 18–22, 2023

Sunday, February 19

11:30 AM – 1:00 PM

Room 9

Journal of General Physiology (JGP)

Advances in Membrane Physiology

Journal of General Physiology has published exciting developments in membrane and cellular physiology for more than 100 years. For this presentation, *JGP* has invited three early career authors to describe the advances in their work on the subject. An introduction to the journal by *JGP* Editor-in-Chief David Eisner will precede the talks, and time will be provided for further discussion.

The mission of *JGP* is to publish mechanistic and quantitative molecular and cellular physiology of the highest quality, to provide a best-in-class author experience, and to nurture future generations of independent researchers. At *JGP*, all editorial decisions on research manuscripts are made through collaborative consultation between the Editor-in-Chief and Associate Editors, all of whom are active scientists. Learn more about *JGP* and read the latest research at <https://rupress.org/jgp>.

Speakers

Fayal Abderemane-Ali, Assistant Professor, Physiology at the UCLA David Geffen School of Medicine

Brooke Ahern, Research Biologist at the US Army DEVCOM Chemical Biological Center

David Eisner, Professor of Cardiac Physiology at the University of Manchester

Polina Lishko, BJC Investigator at Washington University School of Medicine in St. Louis
