Wonhwa Cho to Receive 2018 Avanti Award in Lipids

Rockville, MD — The Biophysical Society is pleased to announce that Wonhwa Cho, Distinguished Professor of Chemical Biology, University of Illinois, Chicago, will receive the Avanti Award in Lipids. Cho will be honored at the Society’s 62nd Annual Meeting at the Moscone Center in San Francisco, California, on Tuesday, February 20, during the Awards Symposium. He will also give a short talk at that time.

Cho is being recognized for his pioneering work in the study of lipid binding domains, his innovative development of lipid-specific fluorescent sensors for real-time imaging in cells, and his contributions to understanding the role of cholesterol in lipid remodeling. Avanti Polar Lipids, Inc., established this award to recognize an investigator for outstanding contributions to our understanding of lipid biophysics.

The Biophysical Society, founded in 1958, is a professional, scientific Society established to encourage development and dissemination of knowledge in biophysics. The Society promotes growth in this expanding field through its annual meeting, monthly journal, and committee and outreach activities. Its 9000 members are located throughout the U.S. and the world, where they teach and conduct research in colleges, universities, laboratories, government agencies, and industry. For more information on these awards, the Society, or the 2018 Annual Meeting, visit www.biophysics.org.
