Dear Speaker Ryan and Leaders McConnell, Pelosi and Schumer,

The undersigned organizations are grateful for your determined and successful efforts to secure an omnibus spending bill in fiscal year 2017 (FY17). On a bipartisan basis, you demonstrated a steadfast commitment to producing a federal budget that is not frozen in time, but rather responds to current and evolving challenges, opportunities and strategic priorities. In that context, we urge you to negotiate another bipartisan budget agreement that advances the nation’s health and raises the non-defense and defense spending caps established under the 2011 Budget Control Act (BCA).

After two rounds of sequestration relief, the sequestration spending caps will come back into full force in FY18, undercutting key national priorities including faster medical progress. We appreciate that the original intent of these caps was to promote fiscal discipline, but the practical effect flouts that intent. While the caps are counterproductive in numerous ways, underinvesting in research is a powerful case in point.

With the FY17 omnibus, the 115<sup>th</sup> Congress took up the mantle from the 114<sup>th</sup> and continued to rebuild the budget of the National Institutes of Health (NIH). This ongoing effort to provide sustained funding for NIH not only reflects Americans’ overwhelming support for faster medical progress, it is also tactical.

NIH research catalyzes private sector innovation and creates jobs. And the research NIH supports is pivotal to fiscal stability: if our nation does not conquer illnesses like Alzheimer’s and cancer, the costs of those health threats alone jeopardize our nation’s long-term fiscal security. Further, the research conducted at NIH provides important

tools for the Centers for Disease Control and Prevention (CDC) as it confronts drug-resistant super bugs, the ever-present threat of pandemics, epidemics, bioterrorism, and other public health threats. Discretionary funding supports American priorities and fiscal imperatives; the sequestration caps undermine them.

Whether the challenge before us is fiscal, economic, health or security-related, Americans do not acquiesce to threats, we end them. Our nation must not block its own path by forsaking strategic investments. We urge you to forge another bipartisan budget deal that increases the spending caps and overrides sequestration, setting the stage for a safe, prosperous and healthy future.

Sincerely,

Research!America
