

Biophysical Journal Call for Papers

Special Issue: Fazly Ataulakhanov: In Memoriam

Editors: *J. Richard McIntosh, University of Colorado Boulder*
Alex Mogilner, New York University
Mikhail Panteleev, Lomonosov Moscow State University
John Weisel, University of Pennsylvania

To celebrate the life and contributions of Fazly Ataulakhanov, an innovative and inspirational biophysicist, we plan a special issue dedicated to his memory. For this volume, we invite contributions of original research articles on complex biological systems that draw on physical theory, mathematical modeling, and quantitative experiments. Topics of interest include, but are not limited to, molecular mechanisms of chromosome segregation, blood coagulation and hemodynamics, metabolic networks, and related systems.

Reviews and perspectives may also be considered, but they must be approved in advance by the editors.

Deadline for submission: December 30, 2026

- Instructions for authors can be found at: <https://www.cell.com/biophysj/authors>.
- Please include a cover letter stating that you would like to contribute to the Fazly Ataulakhanov: In Memoriam special issue and describe why the work fits into the issue.
- All articles will be reviewed upon receipt and will appear online as soon as accepted, even if submitted early.
- Normal publishing charges will apply.
- Questions can be addressed to the BJ Editorial Office at BJ@biophysics.org or to (240) 290-5600.
